YONSEI

Guide for using wireless internet service

Windows 10, 11

Windows 10, 11

For on-campus users

Pre-configuration is required for Wi-Fi access.

■ Things to check before connecting:

① It does not run on ARM-based Windows. Please visit the technical support team office for assistance.

② The downloaded file may not run in Chrome.

   In this case, you need to go to the "Downloads" folder and run the file from there.

③ If a Microsoft SmartScreen warning message appears, click "More info" and then proceed by clicking "Run".

④ Wireless Manager (Anyclick) users: Please delete the program before proceeding.

   Refer to the separate agent removal manual for instructions.

Guide for using wireless internet service

Windows 10, 11

■ Connection Procedure

① Please disconnect from all Wi-Fi connections and connect to "Yonsei_Setup".
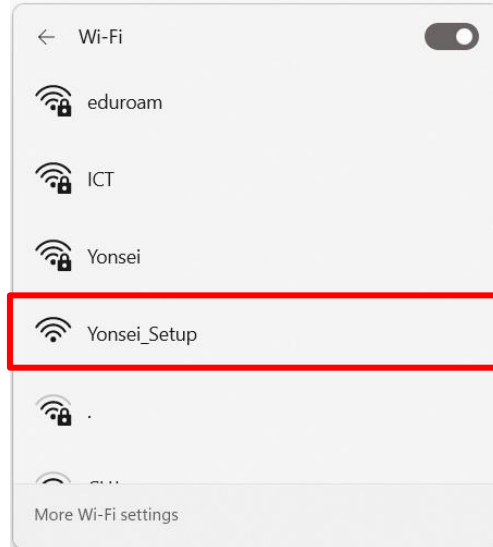

② When a new window appears, click on the "installation file" to download it.

Windows 10, 11

■ **Connection Procedure**

③ **Existing Wireless Manager (Anyclick) users should delete the Wireless Manager and proceed. (refer to separate agent removal manual) If you are a first-time user, proceed to step ④.**
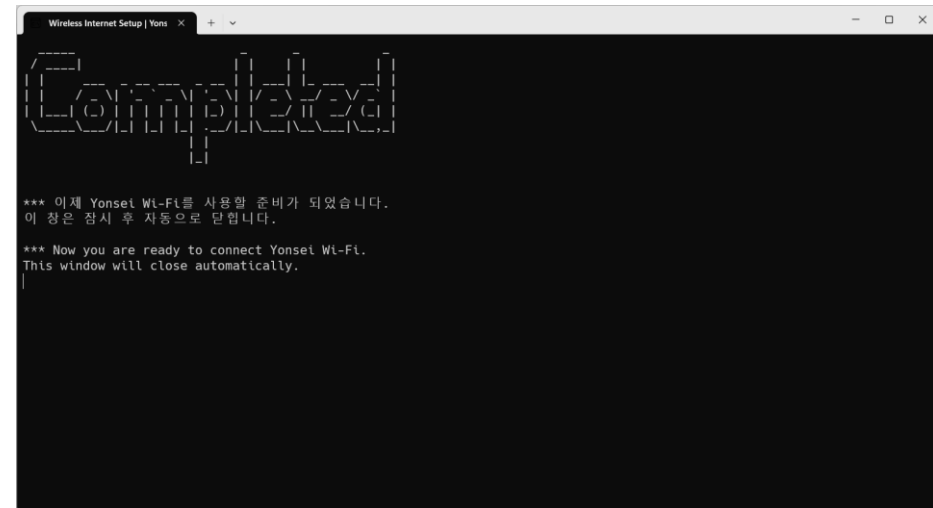

④ When you run the downloaded "Wi-Fi Profile Installer", you can see that the installation is proceeding as shown in the picture.
